

WEBSITE CREATION AND JEWELRY DESIGN

OBJECTIVE:

In this project, you will create a **website** with at least **two pages**. The goal is to combine cultural research, creativity, and technical skills to present your work. This project will take **4 weeks** to complete: 2 weeks for each part.

For this project, you will work on your own.

I. PAGE 1: INDIGENOUS TRIBE PRESENTATION (WEEKS 1 & 2)

1. **Choose an indigenous tribe** from anywhere in the world (e.g., the Maasai of East Africa, the Inuit of the Arctic, the Aboriginal people of Australia).
2. Create a web page describing the tribe. Your page must include:
 - **Location:** Where does the tribe live?
 - **Beliefs:** What are their spiritual or religious beliefs?
 - **Customs:** What are some of their unique traditions, ceremonies, or ways of life?
3. Add **at least 3 images** to illustrate your page (e.g., maps, traditional clothing, ceremonies).

II. PAGE 2: JEWELRY TUTORIAL (WEEKS 3 & 4)

1. Create the design of your jewelry related to the tribe you chose. For this, you will work on Tinkercad (e.g., bracelet, necklace, ring).
 - How does the ethnic inspiration show on your design?
 - What materials do you imagine for your jewelry and why did you choose them?
2. Create a second web page that explains how to make a piece of handmade jewelry (e.g., bracelet, necklace, ring) and present your work. You need to write a clear and detailed step-by-step tutorial for creating the jewelry.

III. WEBSITE REQUIREMENTS

- The website must include **at least two pages**: one for the indigenous tribe presentation and one for the jewelry tutorial.
- Include a **homepage or navigation menu** so users can easily move between pages.
- Use **images** and appropriate formatting (headings, paragraphs, lists) to make your website attractive and easy to read.
- Your text must be written in **English**.

IV. DELIVERABLES

1. **A functional website** with two pages:
 - Page 1: Indigenous tribe presentation.
 - Page 2: Jewelry-making tutorial.
2. Submit your project as a folder containing all necessary files (HTML, CSS, images).

V. TIPS FOR SUCCESS

- For the tribe page, focus on accuracy and respect for cultural details. Use reliable sources for your research.
- For the tutorial page, write clear and logical steps. Test your instructions to make sure they are easy to follow.
- Use your web design skills to make the website visually appealing and user-friendly.
- Check your grammar and spelling to ensure the text is clear and professional.

VI. EVALUATION CRITERIA

- **Content Quality:** The depth and relevance of the information about the tribe and the clarity of the tutorial.
- **Website Design:** Visual appeal, ease of navigation, and appropriate use of images.
- **Technical Skills:** Proper use of HTML/CSS to structure and style your website.
Tutorial here: <https://www.browserstack.com/guide/build-a-website-using-html-css>
- **English Proficiency:** Accuracy and clarity of written text.
